

ALB-EM-COV-25 / Plug for expansion joint profiles

Application: For covering expansion joint profiles in thermal insulation system – ETICS

Material:

- EDPM rubber

Features:

- Can be used with movement beads E and V type;
- Aesthetic finish of expansion joint;
- High resistance to UV radiation and extreme temperatures;
- Extends life of expansion joint detail
- Universal use in straight and corner sections.

Technical data:

Product code	EAN	Color	Length	Package (pcs.)
ALB-EM-COV-25	4751023402864	Grey – RAL 7038	2.5 m	25

Instruction for use:

- Following application of the expansion profiles (ideally ALB-EM-V40-25 – corner; ALB-EM-E40-25 – flat surface expansion profile) insert the plug in the profile.
- To enable the plug installation and sufficient hold in the profile make a 15 – 20 mm wide gap.
- If the expansion joint is too narrow or not ideally straight it is recommended to facilitate the plug insertion in the corner with a hard object with an upright edge - such as a wooden plank etc.

Packaging, storage and transportation: Packed in paper boxes.

- Store in a dry roofed place at - 5°C ~ + 40°C.
- Transport in horizontal position.
