

ALB-EC-S-20 Strengthened corner profile

Application: Strengthened *corner bead with round edge* is applied on extremely exposed places.

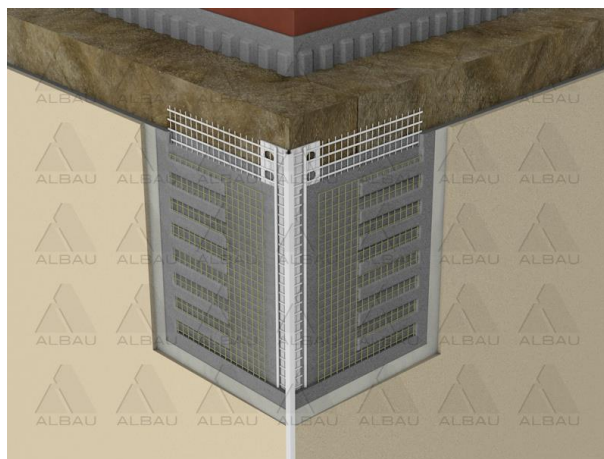

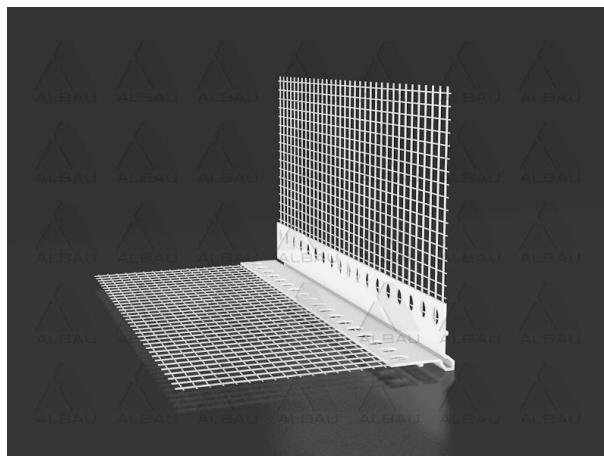

Comply with ETICS insulation system

Advantages:

- Corner bead is used for protection, stabilization and making accurate edges;
- The profile is set to the edge and fixed accordingly to the plaster thickness; the set layer is aligned;
- The round edge simplifies plaster smoothing.

Storage:

A horizontal storage position is recommended. The profiles need to be stored in a dry place the temperature range of -5°C to +40°C. Maximum recommended storage time is 24 months

Technical data:

Product code	EAN	Size of PVC	Mesh dimension	Material	Length	Package
ALB-EC-S-20	4751023400143	25x25mm	100x100 mm	PVC	2 m	25 pcs.
