

**EO MC 20 / Metal sheet connection profile**

**Application** – EO-MC-20 is a metal sheet connection profile with fibre glass reinforcement mesh for expansion jointing of plumber’s elements and facade in the point of connection to sheet metal in the contact insulation system – ETICS.

**Comply with ETICS insulation system**

**Advantages:**

- Very easy connection of the profile to the plumber’s components – sheet metal is to be inserted into the profile’s groove;
- Ensures expansion jointing of the insulating material and plaster with the sheet metal;
- Ensures perfect water drain-off from the system, eliminates capillarity rise under the insulating material;
- Protects the system against mechanical damage and weather effects;
- Prevents hairline cracking;
- Smooth connection of the profiles is provided by connecting pins;
- The final shape enables to finish plaster precisely with constant layer.

**Technical data:**

Product code	EAN	Reinforcement mesh	Material	Length	Package
ALB-EO-MC-20	47510234012348	120 mm	PVC	2.0 m	25 pcs. + 25 connectors

**Installation tips:**

1. Fixed and set the stop profile for connecting to metal sheet.
2. Connect the connector and add another profile
3. Profile has to be cut by scissors.
4. With window shutters it is necessary to bend the profile 90° manually.
5. The mesh can be extended by connectors.

**Storage:**

A horizontal storage position is recommended. The profiles need to be stored in a dry place the temperature range of -5°C to +40°C. Maximum recommended storage time is 24 months

**MADE IN EUROPE**
