PC A / Corner arch profile for interior

Application: PVC corner arch profile. Corner arch profile helps to curve around arches and gives the perfect, protected and stable round design at the edges. Protects corners against mechanical damage and prevents the small crack formation. Creates an aesthetically perfect finish.

Advantages:

- Archway corner bead is used for making of untypical shapes, especially in arch making;
- The bead is set to an edge and fixed accordingly in respect to plaster thickness the set edge is aligned;
- In making of arch shape it is important to form the profiles gradually and equally according to the arch angle;
- The bead also simplifies plaster smoothing.

Technical data:

| Product code | EAN | Material | Dimensions | Thickness | Length | Package |
|--------------|---------------|----------|------------|-----------|--------|---------|
| ALB-PC-A-25 | 4751023400273 | PVC | 25x25 mm | 1.1 mm | 2,5 m | 50 pcs. |

Installation tips:

- Recommended clip on distance is 10 cm;
- The bead can be applied for large arch;
- To shorten the bead, use scissors designed for work with plastic bead.

Storage:

A horizontal storage position is recommended. The profiles need to be stored in a dry place the temperature range of -5°C to +40°C. Maximum recommended storage time is 24 months.
