## IFA P 065 MW / Mineral wool cap $\varnothing$ 65 mm

MW cap to cover the counter-sunk plastic anchors in the thermal insulation system – ETICS

### Material:

- Mineral wool

### Features:

- significant reduction of thermal bridges created by the anchors
- the anchored points need not be treated before the base coat application
- quick and easy installation
- thickness 15 mm

### Instructions for use:

After the anchor is installed (immersed), put the cap in the hole and use a trowel to press into the final position - flush with the insulation surface.

### Packing, storage, transport:

Packed in plastic bags. Avoid contact with moisture.

### Certification:

The product is not subject to any harmonized standard. The product is made from mineral wool boards which are CE-marked against EN 13162.
