PW / Trimming window profile without mesh 6 and 9 mm

Application: Window reveal profile, creates expansion joint between the plaster and the window or door frame. Protects window or door frames and panels against mechanical damage or getting dirty during the application of building adhesive or rendering. Creates an aesthetically perfect finish. Profile size is appropriate to plaster thickness 6 or 9 mm.

Advantages:

- Creates expansion jointing between the plaster and the window or door frame;
- Prevents the final coating from flaking off the window or door frame;
- Protects window or door frames and panels against mechanical damage or getting dirty during the application of building adhesive or rendering;
- Prevents hairline cracking;
- Prevents penetration of cold and noise;
- No additional sealing of joints is required;
- Suitable for narrower window or door frames;
- A slight part of the profile is not hidden, its front side is visible;
- Creates an aesthetically perfect finish.

Technical data:

Product code	EAN	Color	Width	Material	Length	Package
ALB-PW-06-24	4751023400259	White	6 mm	PVC	2.4 m	60 pcs.
